info@RevelationLegal.com

To address this concern, ofPartner has developed RevelationLegal, a unique tool that provides leadership with unprecedented vision into a firm's operation by analyzing the activities performed by everyone within the firm.

RevelationLegal uses a simple online questionnaire that helps participants quantify the activities they perform during a typical year.

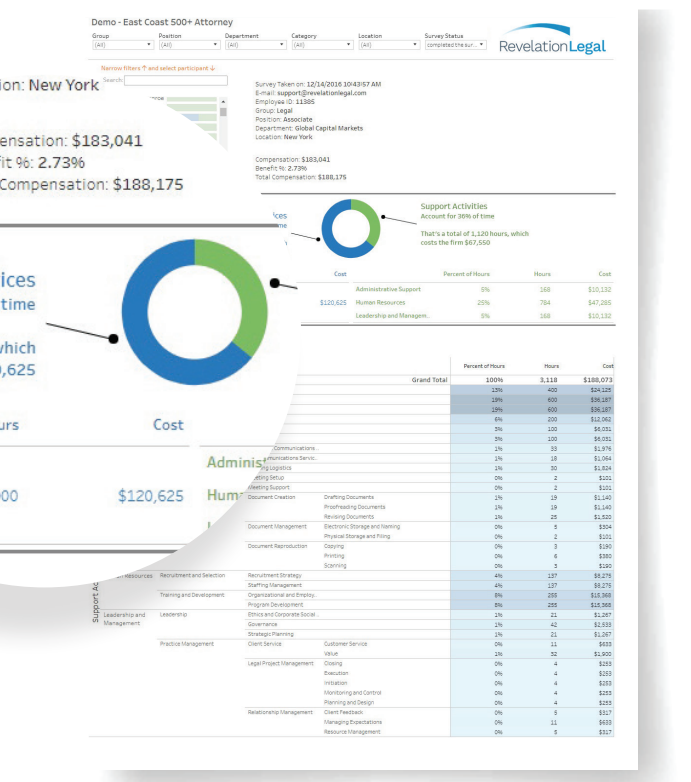

The result is an easy-to-use system of reports and dashboards that allows you to view and analyze your firm as a total organization, focusing on the functions performed rather than positions held.

RevelationLegal also allows you to filter the results to analyze individual offices, departments, practice groups, or employees. The information is organized into a structure that is easy to follow, allowing you to analyze your results effectively without high-level technical experience.

A Sample of RevelationLegal Results

The easy-to-use and fully filterable reports begin with demographic information about the participants.

The Individual Report details the activities of each participant and creates a basis for a constructive one-on-one conversation.

The Compilation Report organizes individual results into powerful insight—perfect for developing strategic initiatives.

The Cross Tab Report uses a heat map view to clearly identify where you are devoting significant resources.
